

# CORONET PEAK

## 2020 UPDATE

# Good Times Since 1947

Coronet Peak is continuing to improve its guest experience, adding to its superior snowmaking system during winter. It also commenced summer operations in December 2019 running through to end of March 2020.

## What's New for 2020

- New 8x seater gondola cabins on the Coronet Express chairlift enhancing the experience for skiers and sightseers in winter and summer.
  - Ongoing investment in our Food and Beverage outlet in order to reduce waste.
  - A new-era, fuel-efficient PB600 Level Red Park groomer fitted with V3 Snowsat will maximise snow cover and offer a closer “shave” of terrain. Now of our grooming fleet will be pinpointed on the slope, measuring snow depth and delivering better results.
  - Increased snowmaking firepower with the latest technology TR10 snowgun and new snowmaking lances. Plus a new pump at Rocky Gully which will increase our pumping capacity by 50L / second. The largest snowmaking installation in the Southern hemisphere can now pump over 350L/s, 60m of snow a minute.
  - Improved mobility year-round with two new Can am vehicles tracked for winter operations.
  - Rentals will offer improved service and flow following a summer remodel. Lighter spaces, more seating including lockers where you need them, as well as lots of new equipment in both performance and recreational rental.
- A \$360,000 investment in the latest Montana Ski Robot which will tune over 20 pairs of skis an hour. It's not only our own skis and boards that will benefit but guests as well.
- We will be running the Super G again in the Winter Games Programme; a showpiece to support the development of local rising star Alice Robinson and our other Kiwi talent.
  - A sixth trap line below the ski area will complete our predator ‘fence’. Complete woody wilding control over the ski area as we go into the 2020 year. Over 10,000 new natives planted on the ski area as we restore our environment.
  - An additional 57-seat coach added to the Coronet Peak fleet as well as other utility vehicles upgrades.
  - A new patrol weather station will help feed into more accurate snow reports.

# About Us & Other Key Features

## About Us

Coronet Peak, located in Queenstown New Zealand, was the country's first commercial ski field, providing good times since 1947. The mountain is Queenstown's urban playground only 20 minutes from downtown along a sealed road. Guests are treated to freshly groomed trails during First Tracks from 8am daily, right through to Night Skiing three nights a week on Wednesday, Friday and Saturdays until 9pm.

Coronet Peak has 280ha of skiable terrain, a 1649m elevation with a 462m vertical drop. An extensive state-of-the-art snowmaking set up (the largest in the Southern Hemisphere) ensures peak conditions throughout the whole season. In 2019 we launched summer operations with the new chairlift/gondola and mountain biking trail lift access.

NZSki, who owns Coronet Peak, The Remarkables and Mt Hutt regularly invests in technology, snow making and trail development to provide guests with world class experiences. The company is also committed to Kaitiakitanga, guardianship, across all three ski areas and has a range of conservation partners and sustainability initiatives.

## Key Features

- Member of the IKON PASS, a group of 38 ski destinations around the world.
- A member of NZSki, offering discounts across Mt Hutt, The Remarkables and Coronet Peak.
- An easy 20-minute drive from downtown Queenstown on a fully sealed access road.
- Diverse terrain – open, rolling, steep, exciting, varied and challenging.
- Longest daily operational hours of any New Zealand ski area with First Tracks & Night Skiing.
- First Tracks runs each day from 8-9am (July until late Sept).
- Night skiing every Wednesday, Friday and Saturday in July and August.
- Home to Elevate – the epic three night ski party series.
- Family-friendly with Skiwiland the early learning ski progression school for kids from three months of age.
- Training ground for Winter Olympic ski teams, including World Cup winner Alice Robinson.

# Mountain stats, dates and times

## General overview

**Targeted opening date:** Saturday 13th June

**Anticipated Closing Date:** 27th September  
*(Subject to weather conditions)*

**Elevation:** 1649m, 462m vertical drop
